Abstract: An abstract is a brief summary of a research article. Abstract length between 150 – 300 words is desired. An abstract typically consist of background, methods, results and conclusions.

Keywords: Give 4-5 keywords, separated by commas.

1. Introduction

The introduction should define the purpose of the work and its significance. The current state of the research field should be carefully reviewed and key publications cited.

References should be numbered in order of appearance and indicated by a numeral or numerals in square e.g. [1] or [2,3], or [4–6]. Finally, briefly mention the main aim of the work and highlight the principal conclusions.

2. Materials and Methods

The materials and methods should be described with sufficient details to allow others to replicate and build on the published results.

2.1. Sub-section 1

New methods and protocols should be described in detail while well-established methods can be briefly described and appropriately cited.

3. Results and Discussion

This section may be divided by subheadings. It should provide a concise and precise description of the experimental results, interpretation, and conclusions that can be drawn.

3.1. Sub-section 1_Bullets, numbers and Equations

Bulleted lists look like this:

- First bullet;
- Second bullet;

Numbered lists can be added as follows:

- 1) First item;
- 2) Second item;

Equations can be presented as below:

Table 1. Tables should be placed in the main text near to the first time they are cited.

Title 1	Title 2	Title 3
entry 1	data	data
entry 2	data	data ¹

¹ Tables may have a footer.

3.4. Sub-section 4

Before and after every section, leave a single spacing. Divide the results and discussion in clear subsections to ease readers' consumption. Place the figures and tables near the discussion paragraph.

The next paragraph begins here.

4. Conclusions

Start your conclusions here.
